## ABOUT SUTRAM 2026

The rise of cyber-financial frauds, deepfake-enabled crimes, social-media manipulation, online impersonation, digital extortion, and AI-generated content has created an urgent need for innovative, indigenous cyber-forensic technologies.

SUTRAM Hackathon 2026 provides a national platform for students and innovators to develop practical, home-grown solutions for real-world cyber-forensic and digital investigation challenges.

### VISION

To encourage the development of innovative, indigenous and practical technology solutions that strengthen digital investigation, incident response and cyber forensics through Artificial Intelligence and emerging technologies.

## ORGANISING INSTITUTIONS

### IGDTUW

Host institution empowering women in STEM and technical innovation.

### ISEA Phase-III (MeitY)

Initiative aimed at generating skilled human resources and awareness in information security across India.

## CORE OBJECTIVES

01

### Indigenous Innovation

Building home-grown forensic tools across the evidence lifecycle.

02

### Real-World Impact

Tackling actual investigative challenges faced by agencies.

03

### AI Integration

Applying AI for evidence authentication, correlation, and attribution.

04

### Innovation Pipeline

Transforming student ideas into mentored Proofs of Concept.

## WHY PARTICIPATE?

### ₹2,50,000 Cash Prize Pool

National recognition and rewards for top solutions.

### Official Recognition

Certificates from IGDTUW & MeitY (ISEA Phase-III).

### Expert Mentorship

Direct guidance from leading academicians and industry leaders (Microsoft, Sedulity Groups).

### Networking

Showcase your PoC to government stakeholders, security researchers, and industry leaders.

## THEME 01

**AI-Assisted Mobile Evidence Intelligence Platform**

AI tools for triaging and analysing mobile device evidence (calls, messages, app history, media, geolocation) to speed up investigation.

## THEME 02

**Multimedia Evidence Authentication & Deepfake Detection**

Frameworks to detect AI-generated/manipulated images, audio, and video while analysing content provenance and evidentiary value.

## THEME 03

**Digital Evidence Correlation & Crime Reconstruction Engine**

Intelligent engines that correlate multi-source data (mobile, CCTV, cloud, social media, financial logs) to reconstruct complex crime events.

## THEME 04

**AI-Powered Cyber Fraud Investigation & Attribution System**

Targeted solutions for UPI fraud, mule accounts, SIM swapping, and phishing by linking victims, devices, and suspects.

## THEME 05

**AI-Powered Digital Investigation Assistant**

Intelligent assistant systems that help investigators explore massive digital evidence pools, supporting reasoning and interpretation.

### THE 6-STEP JOURNEY

- 1 Registration & Idea Submission (PPT Template Submission)
- 2 First Round Selection (Top 50 Teams Shortlisted)
- 3 Expert Mentorship (Technical Guidance & Refinement)
- 4 PoC Development (Building Working Proof of Concept)
- 5 Final Selection (Top 25 Teams Advance)
- 6 Grand Finale at IGDTUW (On-Campus Presentation)
